

Installation instructions

Before starting the installation, please read the instructions carefully, follow them and keep them for future reference.

■ ATTENTION

1. Installation and maintenance of the product should only be carried out by qualified personnel.
2. You can only use the driver (transformer) provided by the manufacturer.
3. During installation or replacement of LED lamps, the power supply must be turned off.
Do not install the product if it shows signs of damage or cracks.
4. Do not cover the spotlight with insulating materials.
5. Do not obstruct the surface of the product with various objects or substances such as paint.
6. If the connections are damaged, please contact qualified personnel for repair, or contact the seller for product replacement.
7. For the installation of the spotlight, we recommend consulting a qualified electrician.
- 8.

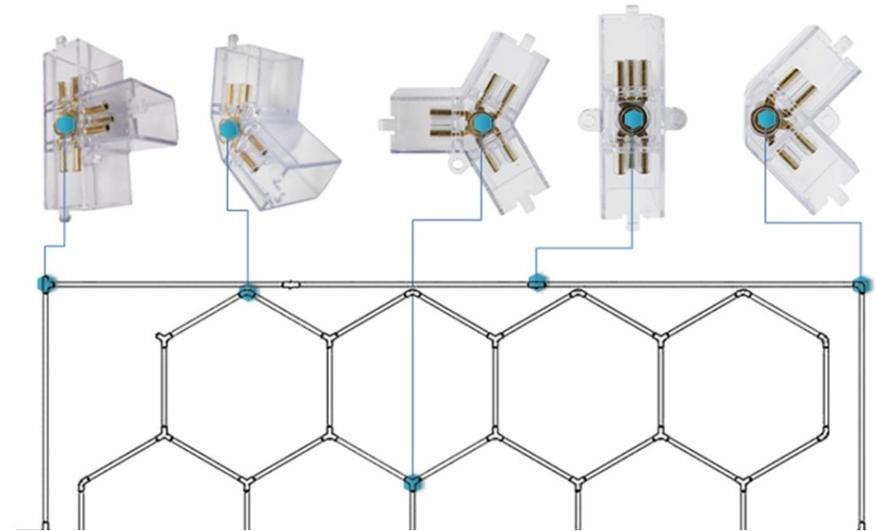

■ INSTALLATION METHOD

1. Turn off the electricity.
2. The hexagons assemble very easily, just insert the lamp into the connector and extend the construction according to the technical drawing.
3. Make sure the lamp is securely inserted into the connector, all the way (click).
4. Only after the entire system is assembled can it be connected to the power supply.
5. The entire lighting fixture will initially be assembled and tested on the floor, after which it will be applied to the ceiling to mark the mounting locations.
6. The power connector can be attached at any angle of the hexagonal system. Its placement will not affect the efficiency of the lighting fixture.
7. Attention! Continuous assembling and disassembling of modules will result in excessive wear and will not go under warranty.
8. Do not unscrew the screws to remove the lamp. Disassembling the lighting fixture leads to reduced lifespan and rapid degradation of the LEDs.
9. **Attention!** The lamp can be connected directly to the power supply.

Accessories (not included in the kit)

Hexagon suspension kit

■ INSTRUCTIONS FOR USE

- Do not use on a circuit with an LED switch or a traditional voltage variator.
- Do not use on a circuit with a motion sensor or photocell.
- Do not use in rooms with high humidity.

■ MAINTENANCE INSTRUCTIONS

- Before cleaning, disconnect from the power supply by closing the circuit breaker, or by closing the fuse in the fuse box.
- Attention! Clean only the luminous surface of the lamp.
- Avoid getting moisture into the terminal box or any other conduit.
- Before you start cleaning, let the spot cool down for 5 minutes!
- Cleaning will only be done with a soft and dry cloth.

■ ENVIRONMENT PROTECTION

The meaning of this symbol, which you can find directly on the item, in the assembly instructions or on the packaging, is explained below:

- This item should not be disposed of with household waste after the end of its working life.
- The non-functional lighting fixture must be brought to a collection point where it will be accepted for recycling electrical and electronic equipment.
- Materials are recyclable according to their specifications.
- Correct recycling of these materials makes a significant contribution to the environment.
